Morningstar Return**Morningstar Risk****Investment Information****Investment Objective & Strategy**

The investment seeks long-term capital appreciation.

The fund is a custom multi-manager fund that invests in a wide array of international stocks. It seeks to exceed the return of the MSCI All Country World Ex US Index by allocating the fund's capital between three active investment managers. It has an established target weighting to each of the three managers, however, due to market movements and cash flows, the fund may deviate from its intended target at times.

Category Description: Global Large-Stock Blend

Global large-stock blend portfolios invest in a variety of international stocks and typically skew towards large caps that are fairly representative of the global stock market in size, growth rates, and price. World large stock blend portfolios have few geographical limitations. It is common for these portfolios to invest the majority of their assets in developed markets, with the remainder divided among the globe's emerging markets. These portfolios are not significantly overweight U.S. equity exposure relative to the Morningstar Global Market Index and maintain at least a 20% absolute U.S. exposure.
